KANSAS CITY TERRA COTTA
and FAIENCE CO.

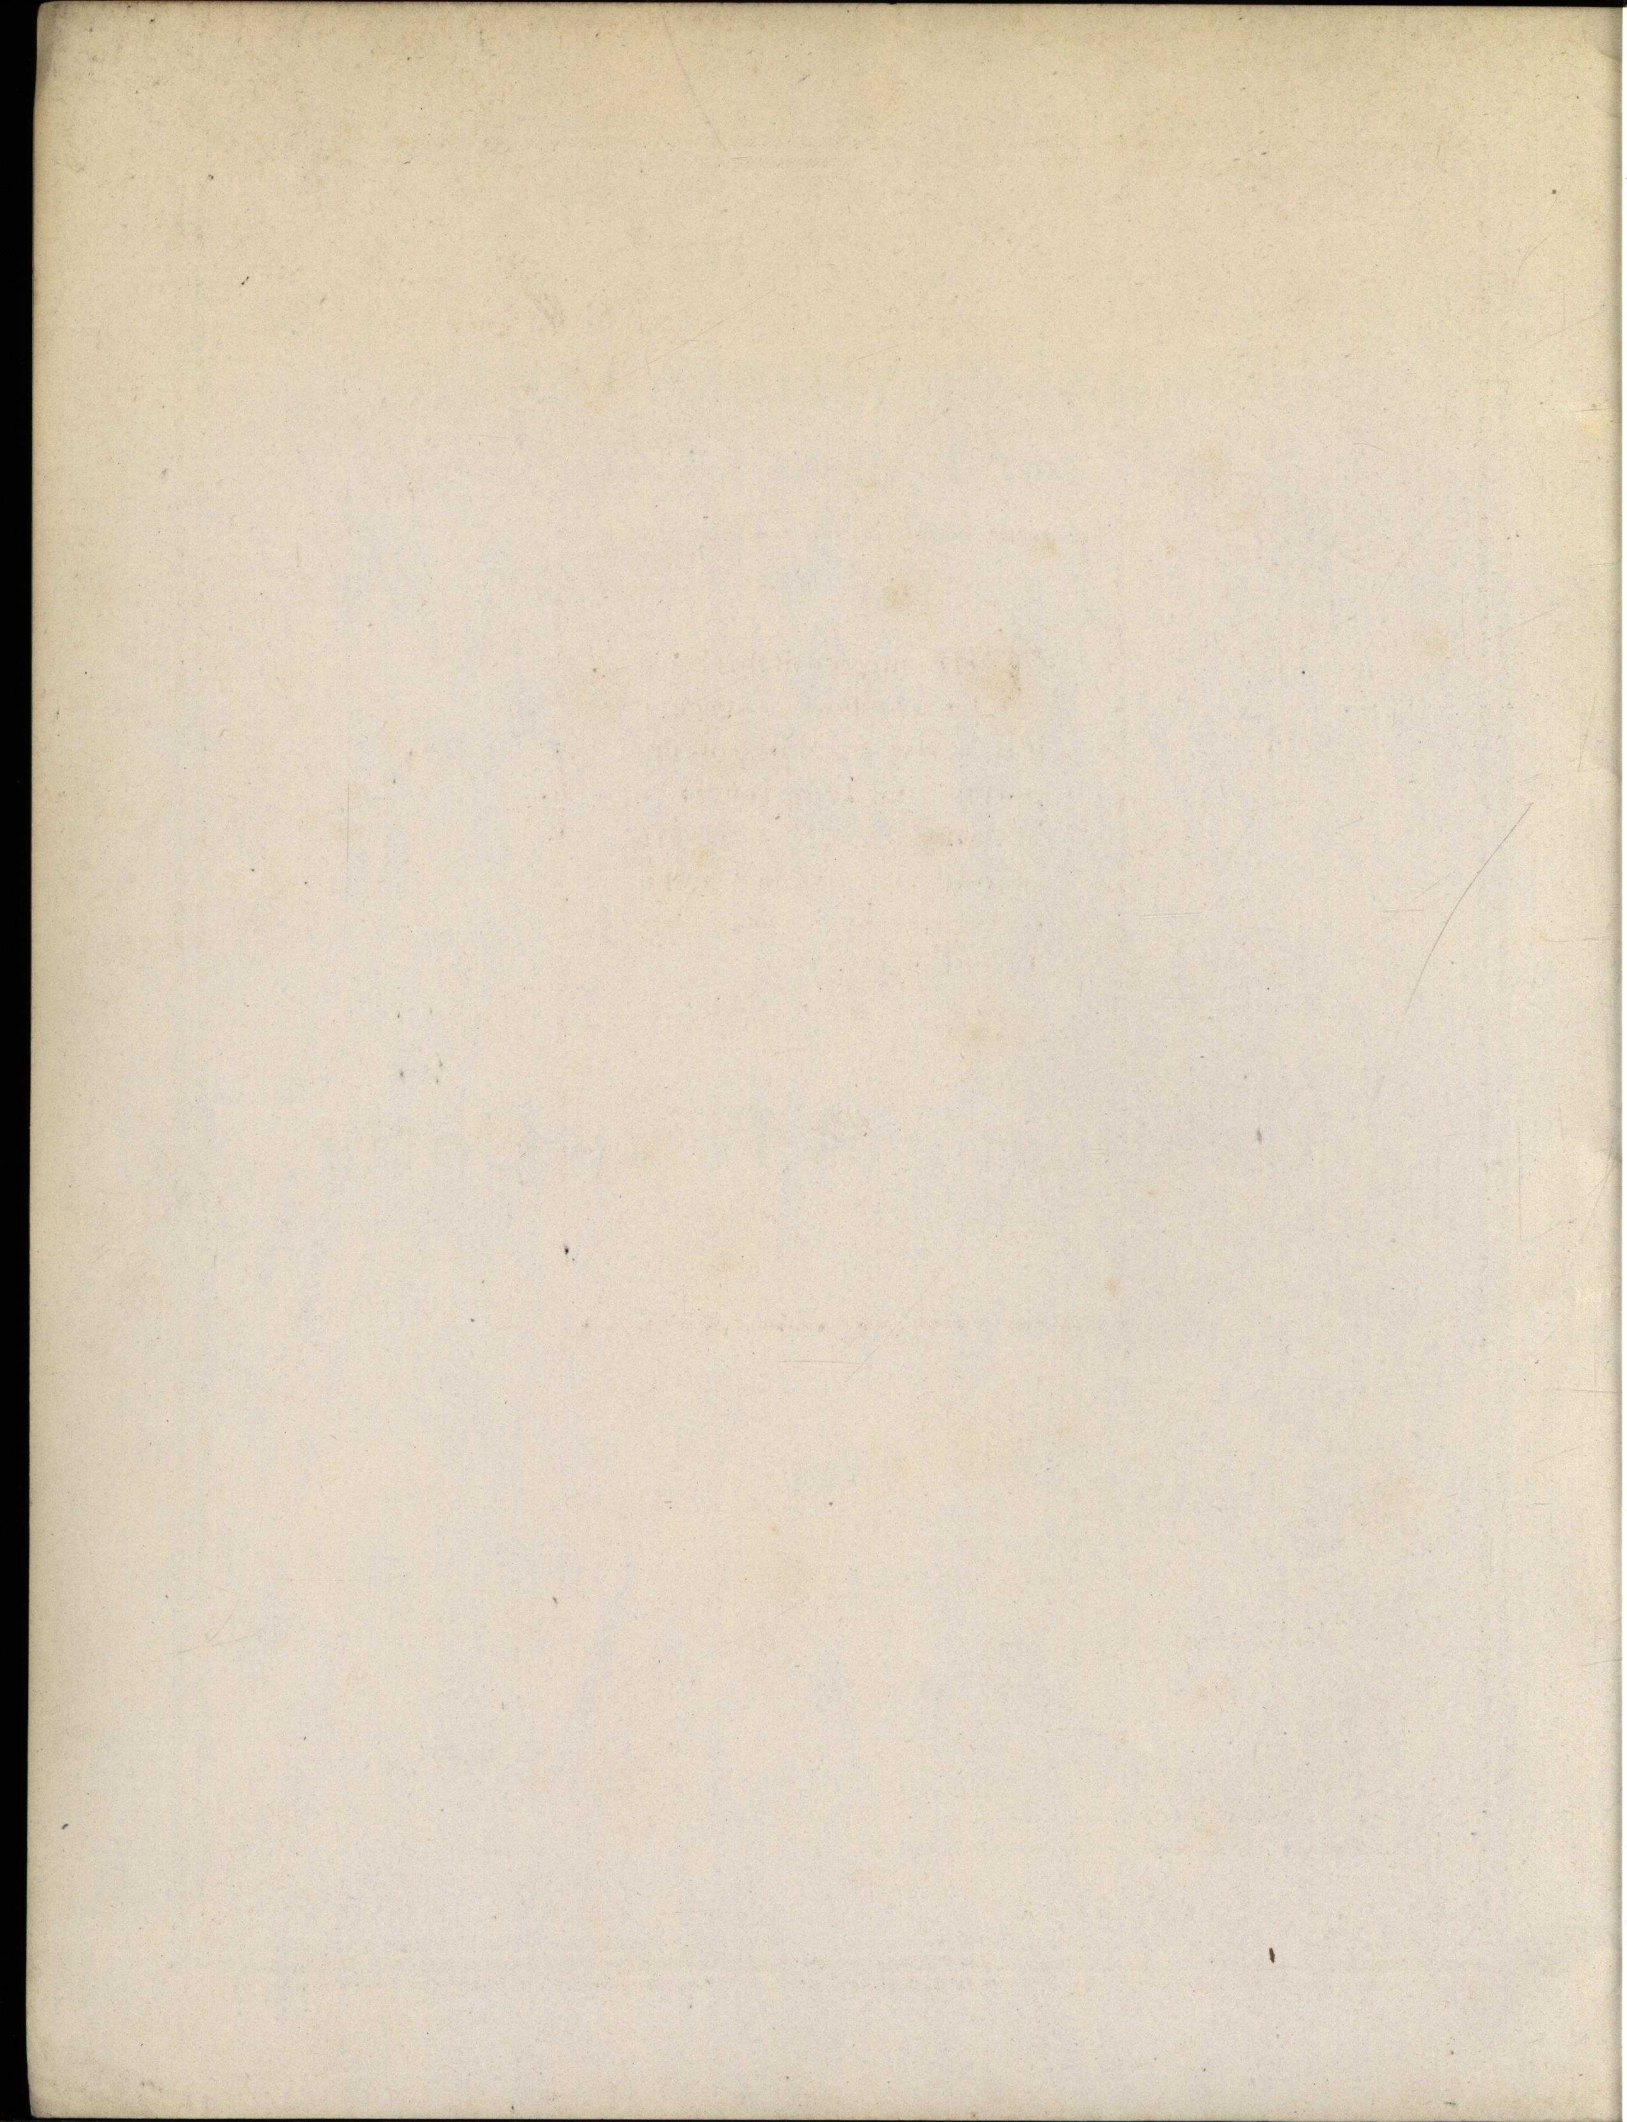

KANSAS CITY
MISSOURI

Architectural Terra Cotta

OFFICE AND WORKS:
Nineteenth Street *and* Manchester Avenue

THE purpose of this booklet is to show in a general way a few examples of important and representative buildings of the Southwest, adorned and dignified architecturally by Kansas City Terra Cotta.

KANSAS CITY TERRA COTTA AND FAIENCE COMPANY

St. Regis Apartment Hotel

Northeast Corner
Linwood and Paseo Boulevards,
Kansas City, Missouri.

MESSRS. OWEN AND PAYSON,
Architects.

THE Architect of this fine apartment hotel selected our No. 10 White Matt Glazed Terra Cotta.

Not only is the trim to the upper stories terra cotta but the fire escape balconies, the colonnade of the entrance porch and the trim to the first story bay are also Kansas City Terra Cotta.

Drawings sent to us for estimate will be returned promptly—*with quotation*

KANSAS CITY TERRA COTTA AND FAIENCE COMPANY

Masonic Temple

Leavenworth, Kansas.

WILLIAM P. FETH,
Architect.

THE front of this temple is of a light shade unglazed terra cotta except the fields of the piers, which are of brick.

The emblems of the Masonic Order in the frieze over the piers are modeled in bold relief—and further accentuated in Kansas City Polychrome of appropriate shades.

An expert from our factory will solve your terra cotta construction problems—*telegraph us.*

KANSAS CITY TERRA COTTA AND FAIENCE COMPANY

Republic Building

Southwest Corner
10th and Walnut Streets,
Kansas City, Mo.

FREDERICK C. GUNN,
Architect

TEN stories of solid White Lustrous Glazed Kansas City Terra Cotta. Not only a large terra cotta order but one requiring the utmost mechanical skill in manufacture as well as the ability to carry out the architect's conception of the ornamental features in a thoroughly artistic manner.

We welcome architects' inspection of ornamental models at our factory. When a personal call is not convenient we send photographs for approval.

KANSAS CITY TERRA COTTA AND FAIENCE COMPANY

National Bank Building

Bartlesville, Oklahoma.

C. H. DEITERING,
Architect

THE proper combination of architectural terra cotta trim and brick produces a very pleasing exterior. The trim beginning at the first story piers to the cornice and coping of the parapet is a warm Buff Unglazed Finish Kansas City Terra Cotta harmonizing in color with the brick fields.

Surface texture as well as color is produced in Kansas City Terra Cotta.

KANSAS CITY TERRA COTTA AND FAIENCE COMPANY

Christian Church Hospital

Paseo Boulevard and 27th Street, Kansas City, Missouri.

HENRY F. HOIT, *Architect.*

ALL architectural trim except column shafts is a limestone grey shade of Kansas City Terra Cotta. The highly ornate brackets to balconies over entrance and the very large capitals to columns are good examples of the quality which always enters into the modelling done in our factory studio.

Flanders Building

Springfield, Missouri.

MESSRS. MILLER, OPEL & TORBITT,
Architects

FROM sidewalk to skyline both street facades of this large office building are entirely faced with Kansas City White Glazed Terra Cotta. A design of severely plain architecture as this requires very close mechanical alignment of Ashlar joints.

We are thoroughly equipped with the machinery required for grinding and fitting to fine joints.

KANSAS CITY TERRA COTTA AND FAIENCE COMPANY

Daniels Building

Tulsa, Oklahoma.

J. B. CURTIN,
Architect

R. T. DANIELS,
Owner and Builder

THE material facing the two street fronts to the Daniels Building is of a White Lustrous Kansas City Terra Cotta, excepting the cartouches, festoons and pendants at the third story. These ornamental features are Polychrome Terra Cotta, the Old Rose shade predominating.

Our Ceramic Department is equipped to develop special colors in the shortest possible time.

KANSAS CITY TERRA COTTA AND FAIENCE COMPANY

Apartment House

Southwest Corner
Linwood and Benton Boulevards,
Kansas City, Missouri.

GARDNER BROTHERS,
Architects and Builders

THE fronts of this apartment building are of dark tapestry brick, trimmed with a Buff Toned Matt Glazed Kansas City Terra Cotta.

This design shows a pleasing and economical application of terra cotta in connection with brick—both permanent and fire-resisting clay products.

Even a small quantity of terra cotta properly placed will relieve monotony and add charm to your building.

KANSAS CITY TERRA COTTA AND FAIENCE COMPANY

First National Bank

Sedan, Kansas.

MESSRS. GREENBAUM AND HARDY,
Architects,
Kansas City, Mo.

THE entire facade of the First National Bank of Sedan is done in a beautiful shade of Cream Matt Glazed Kansas City Terra Cotta.

Dignity of architectural appearance is necessary to every bank and a building as distinctive as this impresses itself upon the memory of the passerby, or potential depositor.

Architects are invited to consult us as to terra cotta color possibilities. A large stock of samples always available.

KANSAS CITY TERRA COTTA AND FAIENCE COMPANY

THE manufacturing facilities of the Kansas City Terra Cotta and Faience Company are excellent for the production of fine Architectural Terra Cotta, possessing both ample floor space and the required mechanical equipment so essential to modern methods of manufacture.

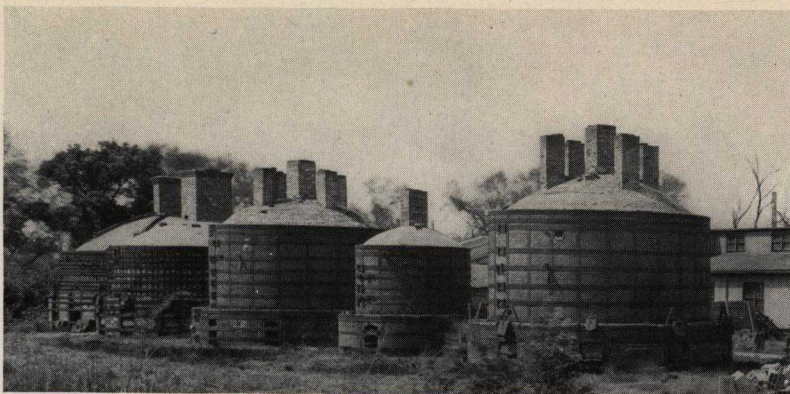

The Ceramic Department is in charge of competent men and carries a full line of time tested glazed and unglazed finishes. We are always prepared to develop new colors when required.

Kansas City Terra Cotta is always carefully assembled and numbered to correspond with our Setting Drawings. The Assembly Department is equipped with modern machinery for grinding of joints to alignment.

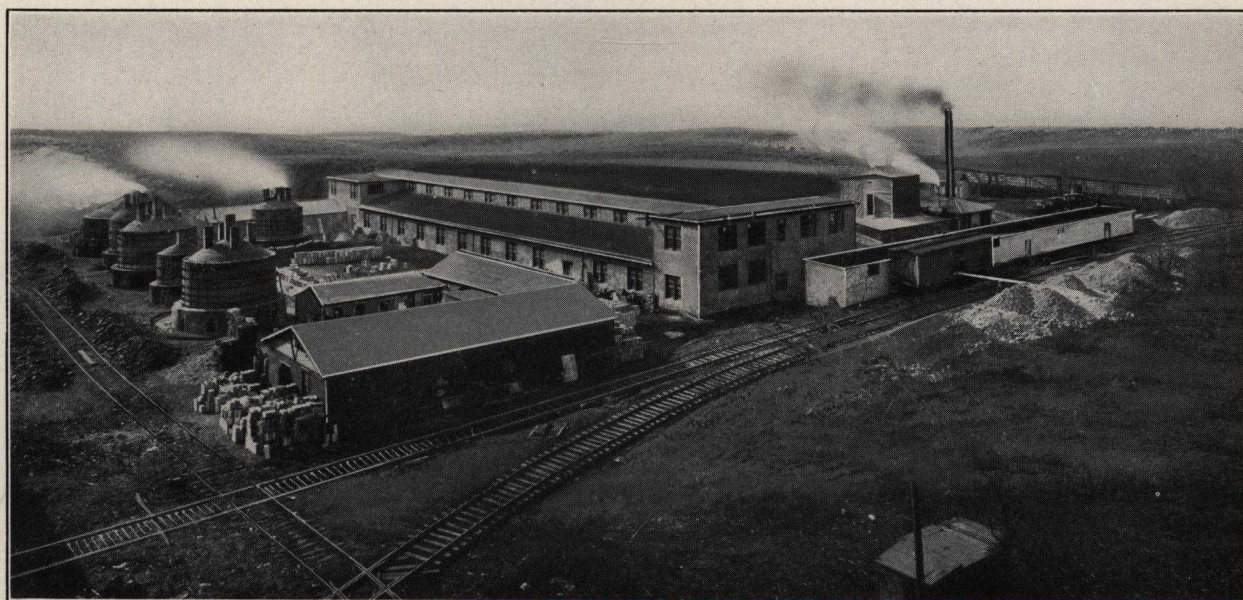

The shipping facilities are unsurpassed as the plant is located on two railroads, the Mo. Pac. R. R. and the K. C. S. R. R.

Architects' drawings and specifications sent will be returned to you promptly with our estimate and such other information as may be desired.
